

Countryside Initiative 2005 RFP: Supplemental Information

Item No. 3: Sustainable Agriculture Select Bibliography

The following references are a *select* bibliography. While they represent a relatively small portion of the existing literature on sustainable agriculture, these references have each contributed useful ideas and concepts to development of the Countryside Initiative. And all of the works cited here will be helpful to Initiative proposers and lessees. Neither the National Park Service nor the Cuyahoga Valley Countryside Conservancy necessarily endorse particular ideas or concepts presented in these references. In general, though, we believe each reference contains much sound and useful information regarding the practice of sustainable agriculture.
